

UPPMAX WORKSHOP ON VISUALIZATION

UPPMAX will give a two day workshop on introduction to Python programming and VTK for Visualization.

Focus will be on how to read your own data and visualize it using Python and the Visualization Toolkit (VTK).

Several examples will be discussed and there will be exercises where you will be helped to create both simple and advanced 3D visualizations.

There will also be time to discuss your visualization needs. Both days will start 10:15 with an introduction (2x45) minutes and there will be exercises in the afternoon 13:15 - 16:00.

Schedule

19 March, Python

10:15 Room 2115 Introduction to Python
13:15 Room 1312 Exercises

20 March, VTK

10:15 Room 2115 Introduction to VTK
13:15 Room 1312 Exercises

To register send an email to Anders Hast before 10 March:

anders.hast@it.uu.se

ps. You are free to participate in any part of the workshop you wish but the seats are limited to 20 persons so make the registration asap!
