5 million books

STACK OUR BOOKS
IN A PILE

and it will be as high as 15 Mount
Everests

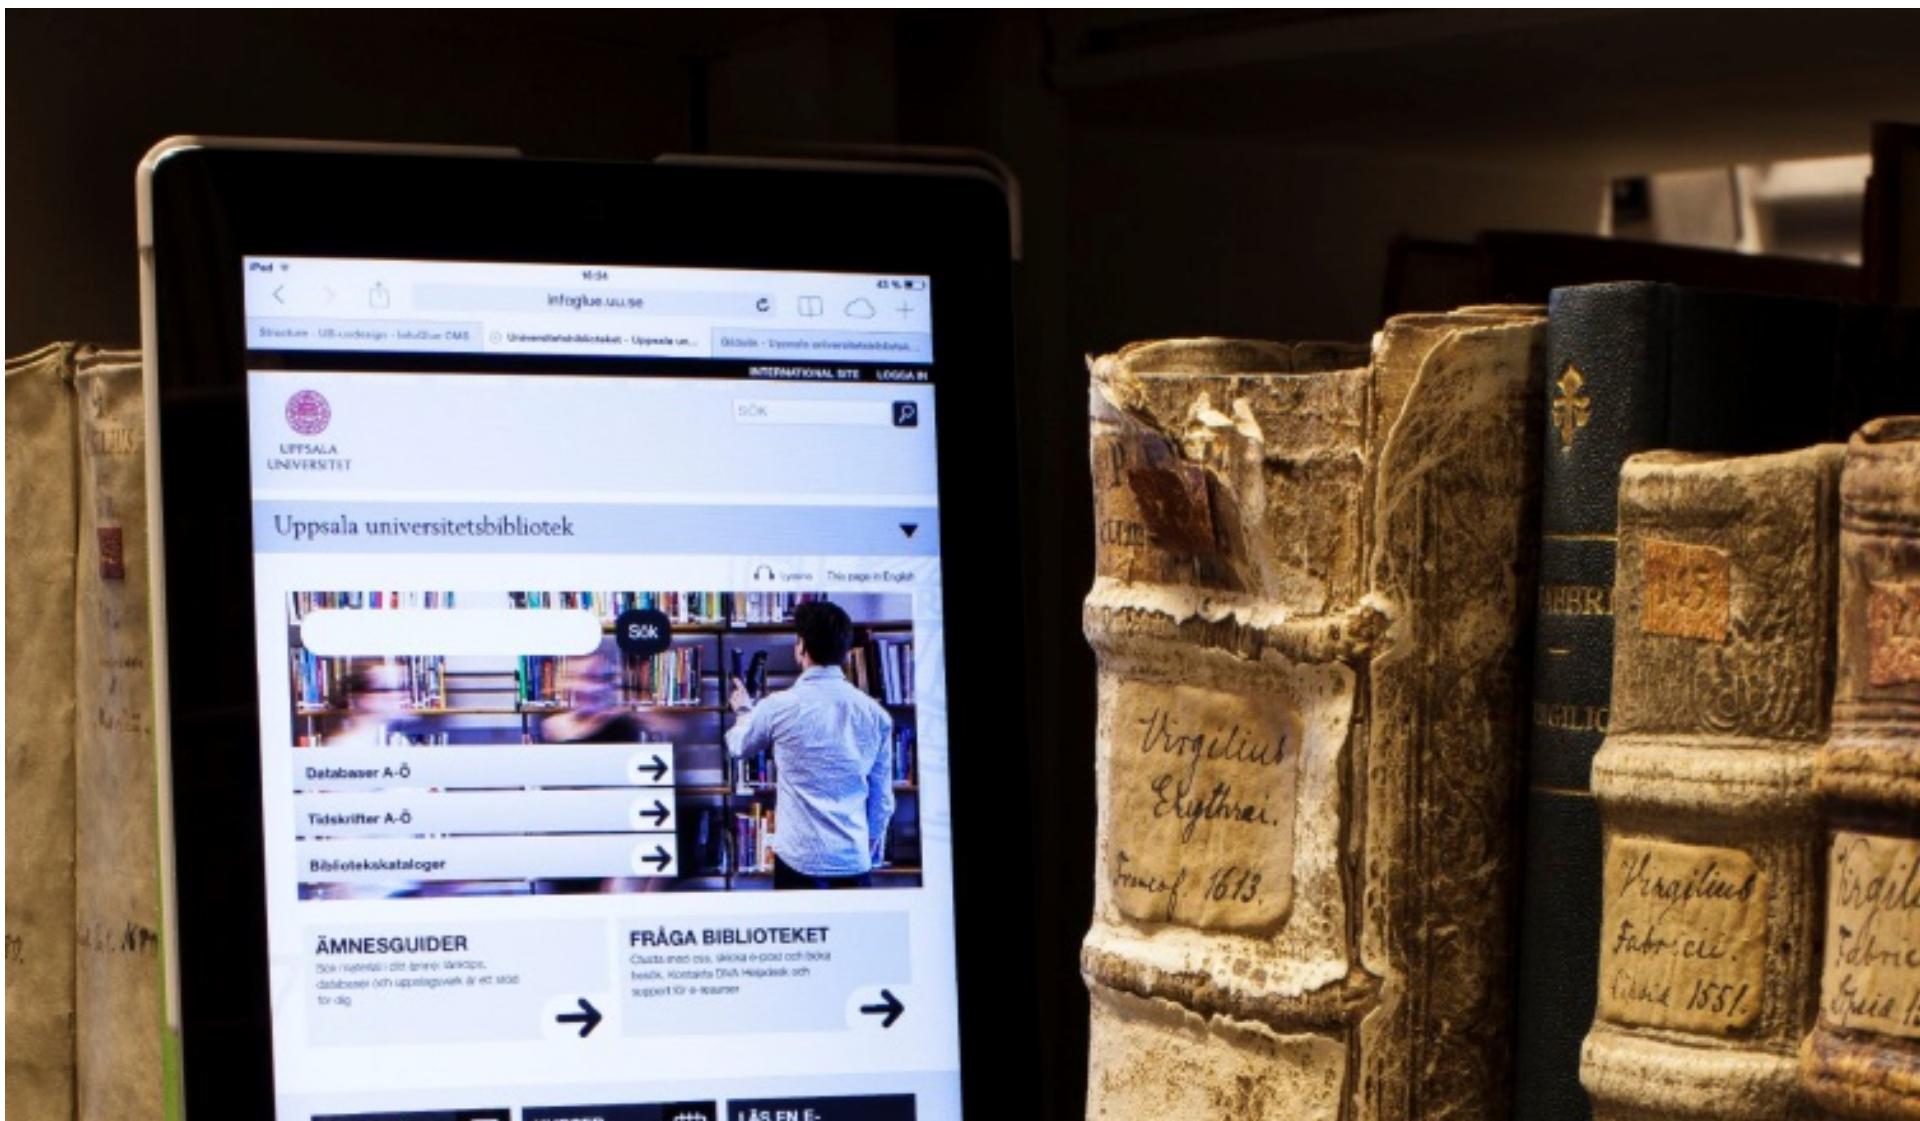

Printed Material at Uppsala University Library

>5 000 000 books

+ journals, magazines, manuscripts, letters,
music scores, maps, broschures, pictures and
much more...

At 12 subject libraries and in-house and
external repositories.

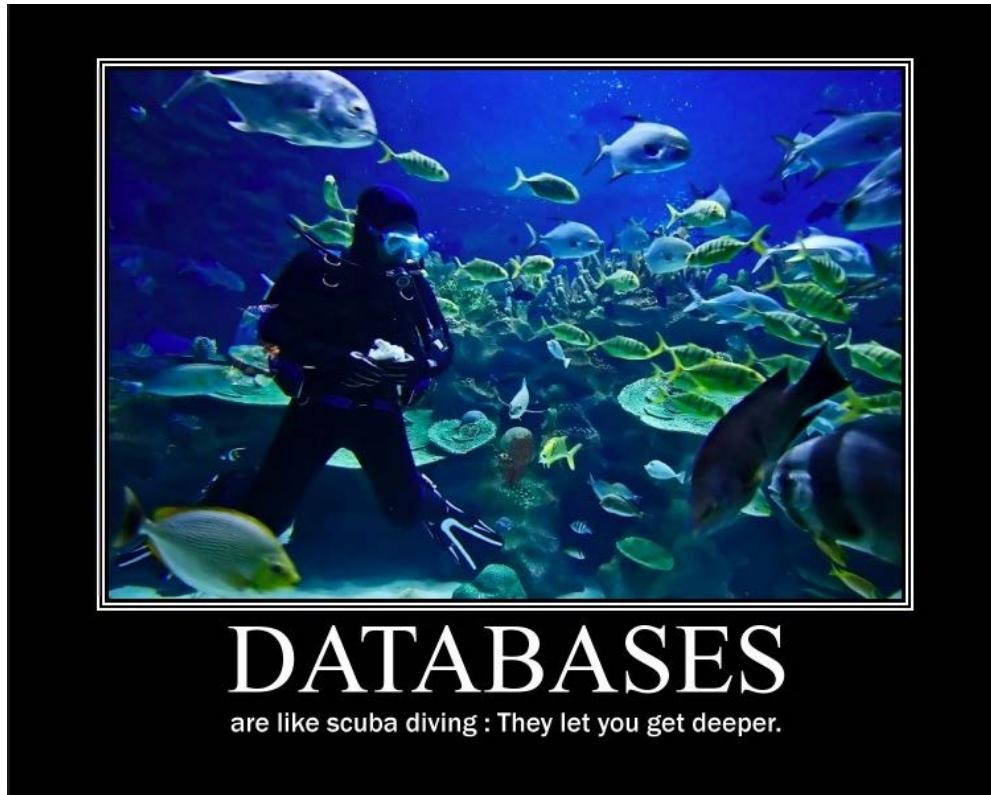

550 000 e-books

25 000 e-journals

300 databases

(with articles, journals, books, patents, standards, theses, conference papers, facts, data, pictures, TV-programs...)

Access to e-resources from home

Most of the Library's e-journals, e-books and databases are not free. We buy them or subscribe to them. This means that we are bound by agreements to provide access to them only to students, researchers and others at Uppsala University. Therefore, if you are at home or travelling and want to access an e-journal or database you will have to log in. The tips below will explain what you need to do.

1. Log in via the Library's website

Go to Uppsala University Library's website and click on the link to the e-journal, database or e-book that you are interested in. Inbedded in these links is a proxy function which enables you to log in via the University's CAS (Central web authentication) page giving you free access to all the Library's e-resources.

2. Proxy settings in your computer or web browser

You can also add the proxy server to the settings in your computer or web browser in order to access the e-resources remotely. Instructions are available on the University's website: [Web Proxy at Uppsala University](#).

Rules for using electronic resources

As a Library user, you can freely print out or download to your own computer most of the e-resources the University Library buys or subscribes to.

However, the agreements the Library has with its suppliers do not permit systematic downloading of whole or large parts of the content of a platform or a database.

For certain resources, there may be limitations to printouts and downloading. This applies in particular to e-books, where the content is primarily intended to be read straight from the screen. Here you can find more information about [terms and conditions for use of various e-book platforms](#).

Many of the Library's agreements for e-resources are administered centrally by the National Library of Sweden's Department for National Collaboration. The terms governing the use of the e-books, e-periodicals and databases covered by these agreements are described on the page [Central agreements procured by the National Library of Sweden](#) (in Swedish).

If you are uncertain about the terms and conditions of use for an e-resource and want more information, please contact the [E-resource team](#).

*"It's best to know what you are looking for
before you start looking for it"*

From Winnie the Pooh's Little Book of Wisdom

Problem formulation and search words

“What is fuzzy thought will be fuzzy searched”

- What is the problem formulation for your subject?
- In what way could the problem be summarized into a question?
- Break down your question – pick the key words/key concepts and combine them strategically
- Try to find different ways to describe your question

Problem formulation and search words

What **environmental impact** has **wind power**?

environmental impact
ecological impact
environmental effects
nature conservation

wind power
wind energy
wind turbines
wind farm

Find synonyms, alternative concepts, broader and narrower terms and also opposite concepts

Use word books, handbooks , dictionaries, course books and the databases "thesaurus" to find good search words. Tips: Wikipedia!

UPPSLAGSVERK, ORDBÖCKER OCH HANDBÖCKER INOM DATAVETENSKAP / IT

- Computer Encyclopedia
- ComputerUser High-Tech Dictionary

Sök definitioner av mer än 7000 "high-tech" termer.

- Dictionary of algorithms, data structures and problems
- Förklaringar och definitioner av algoritmer, standard funktioner, data strukturer och annat. Alfabetisk lista samt ämnesindelad lista.
- Dictionary of Computing
- Dictionary of Computing (Oxford Dictionary of Computing) 6 ed.

- Dictionary of Information Security

- Dictionary of Information Technology

- Dictionary of the Internet

- Encyclopedia o Machine Learning

- Encyclopedia of Algorithms

- Encyclopedia of Cryptography and Security

- Encyclopedia of Database Systems

- Encyclopedia of Human-Computer Interaction, 2nd ed.

- Encyclopedia of Multimedia

- Encyclopedia of Parallel Computing

- English for Electronics and Computer Science : Study Guide

- English-Japanese, Japanese-English Dictionary of Computer and Data-Processing Terms

- FOLDOC

En sökbar ordbok av termer (ca 15.000) inom alla områden av datavetenskap och programmering.

- Handbook of Cloud Computing

ALLMÄNNA UPPSLAGSVERK

- [Answers.com](#)
Här kan man samsöka i flera fria engelskspråkiga ordböcker och uppslagsverk på webben. Söktjänsten innehåller också en wikibaserad fråge- och svarstjänst och "Videoanswers".
- [Encyclopaedia Britannica Academic Edition](#)
Ett av världens största engelskspråkiga uppslagsverk. Innehåller även Merriam-Webster's Collegiate Dictionary.
- [Nationalencyklopedin - NE](#)
Omfattande allmänt uppslagsverk på svenska. Innehåller även svensk och engelsk ordbok samt atlas.

ALLMÄNNA ORDBÖCKER

- [EuroVoc](#)
EU:s flerspråkiga tesaurus.
- [Folkets lexikon](#)
Engelsk-Svenskt, Svensk-Engelskt lexikon
- [IATE Interactive Terminology for Europe](#)
är EU:s 24-språkiga ordbok. Innehåller mycket facktermer. Till vissa ord finns också definitioner. Bra för översättning mellan engelska och svenska.
- [Merriam Webster](#)
- [Merriam-Webster Visual Dictionary Online](#)
- [Norstedts ordböcker online \(Wordfinder\)](#)
Ordbokspaket med 12 lexikon på 7 språk, i huvudsak från Norstedts förlag.
mer...
- [Oxford English Dictionary](#)
Den mest omfattande engelska ordboken. Beskriver ordens ursprung, deras historiska och nutida betydelse. Alternativa stavningar och uttal från olika delar av världen redovisas.
- [Svenska akademiens ordlista](#)
- [Svenska akademiens ordbok](#)
historisk ordbok som beskriver all slags skriven svenska från 1521 till våra dagar
- [Synonymer.se](#)
Synonymordbok
- [Tyda.se](#)
Här kan du översätta ord och uttryck mellan engelska och svenska (och tvärtom).

Problem formulation and search words

What **environmental impact** has **wind power**?

environmental impact
ecological impact
environmental effects
nature conservation

wind power
wind energy
wind turbines
wind farm

Find synonyms, alternative concepts, broader and narrower terms and also opposite concepts

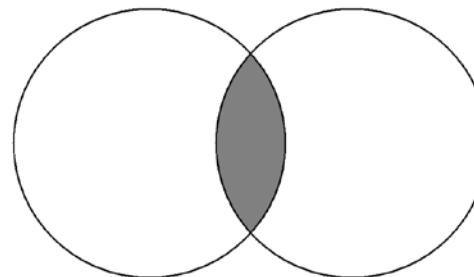

Use word books, handbooks , dictionaries, course books and the databases "thesaurus" to find good search words. Tips: Wikipedia!

Search techniques

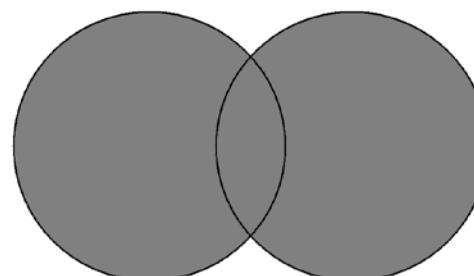

- Truncation (stemming)
 - right hand: comput*
 - left hand: *electric
- masking
 - wom?n, organi?ation
- exact phrase searching
 - “user patterns”

Boolean operators

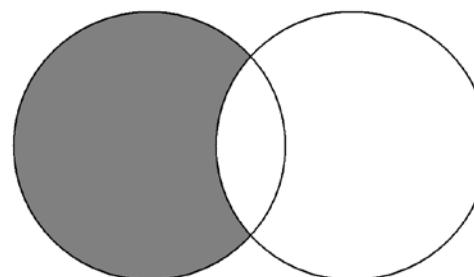

AND

OR

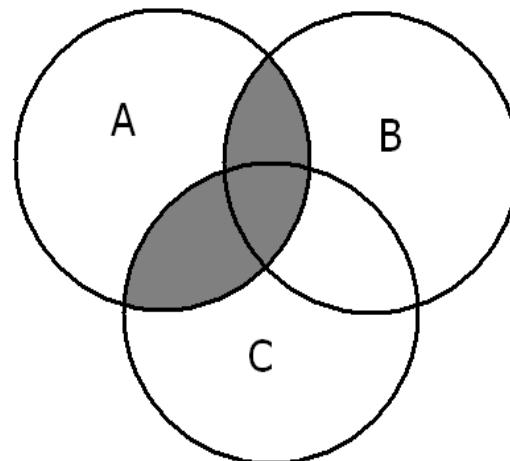

NOT

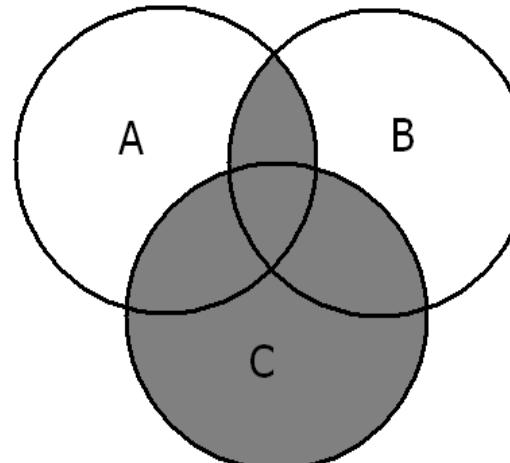

(SAME, NEAR, NEAR4)

Boolean operators with brackets

A AND (B OR C)

(A AND B) OR C

GMO AND (plants OR algae)

or use different search boxes

Search for:	"genetically modified organism"
E.g., "heart attack" AND stress	
AND	<input checked="" type="checkbox"/> plants OR algae

Combine synonyms/alternative concepts with OR

"wind power" **OR** "wind energy"

Combine different aspects with AND

("wind power" OR wind energy) **AND**

("environmental impact" OR "ecological impact" OR...)

"electric car" OR "electric cars" OR "electric vehicle" OR "electric vehicles" X

AND

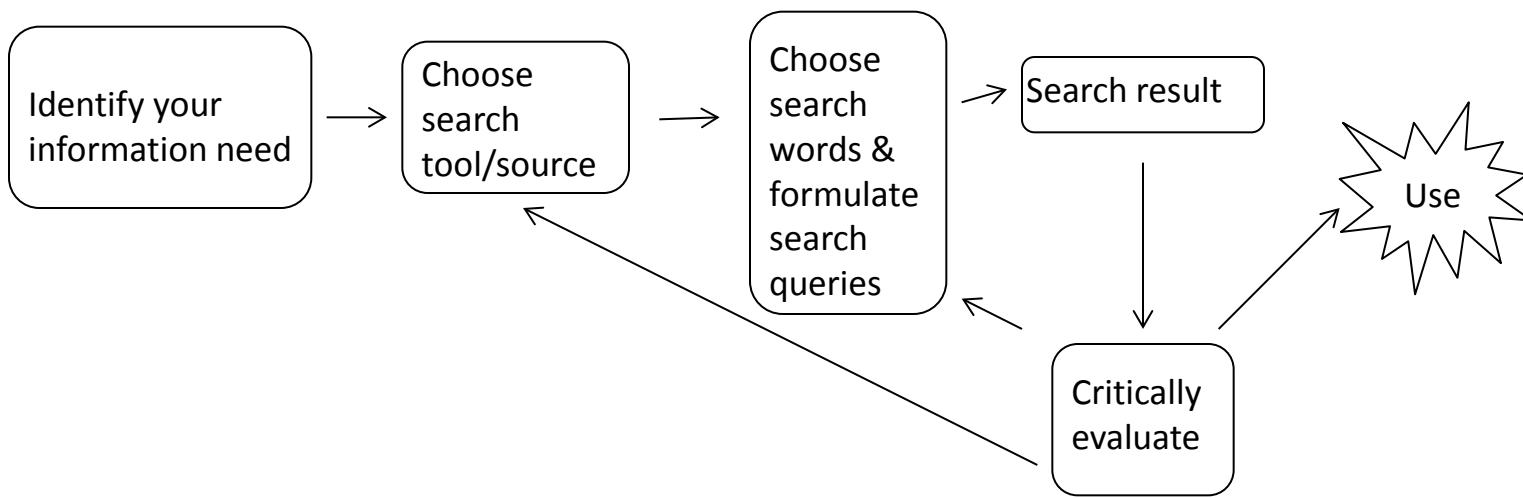

"battery system" OR "battery systems"

AND

Author Notes

Clarissa Peterson is a UX designer and web developer, and co-founder of Peterson/Kandy, a Montreal-based digital consultancy specializing in creating responsive websites. She frequently speaks and gives workshops on responsive design, mobile strategy, and user experience.

Terms of use

Descriptive content provided by Syndetics™, a Bowker service.

Summary

Deliver an optimal user experience to all devices-including tablets, smartphones, feature phones, laptops, and large screens-by learning the basics of responsive web design. In this hands-on guide, UX designer Clarissa Peterson explains how responsive web design works, and takes you through a responsive workflow from project kickoff to site launch.

Ideal for anyone involved in the process of creating websites-not just developers-this book teaches you fundamental strategies and techniques for using HTML and CSS to design websites that not only adapt to any screen size, but also ([...read more](#))

Peer review

- An article is sent to a scientific journal for publishing
- Evaluated by the editor
- Two or more researchers also review it
- The way to guarantee the scientific quality
- Look at academic quality, content, language, and if it suits the journal
- The author probably has to revise the manuscript once or twice before it is accepted

Graphene-based composites

by [Huang, Xiao](#); [Qi, Xiaoying](#); [Boey, Freddy](#); [Zhang, Hua](#)

Graphene has attracted tremendous research interest in recent years, owing to its exceptional properties. The scaled-up and reliable production of graphene derivatives, such as graphene oxide (GO) and reduced graphene oxide (rGO), offers a wide range of possibilities to synthesize graphene-based functional materials for various applications. This critical review presents and discusses the current development of graphene-based composites. After introduction of the synthesis methods for graphene and its derivatives as well as their properties, we focus on the description of various methods to synthesize graphene-based composites, especially those with functional polymers and inorganic nanostructures. Particular emphasis is placed on strategies for the optimization of composite properties. Lastly, the advantages of graphene-based composites in applications such as the Li-ion batteries, supercapacitors, fuel cells, photovoltaic devices, photocatalysis, as well as Raman enhancement are described (279 references).

**Environmental risk assessment of genetically modified organisms**by [Andow, David Alan](#); [Hilbeck, A](#)

2008

[Permalink](#)

Within Vietnam, the environmental risks of transgenic plants to the environment and to human health have been assessed. This study found that the safety of GM plants has been evaluated in a haphazard manner, leading to unreliable results. The study also found that there is a lack of knowledge about the environmental impacts of GM plants, and building modern labs to assess their safety has received...

Suppliers of books and journals

Uppsala University has contracts with the following suppliers of books and journals. This is to ensure good service and the best possible discounts

Uppsala University has negotiated contracts with a selection of book suppliers. These contracts allow the University departments to buy books at discounted prices. The period of contract is 30th September 2015 with the possibility of an extension for one year at a time, three times, however no longer than to 30th September 2018.

Purchases must primarily be made from the main supplier F.Delbanco GmbH & Co. KG . In need of fast delivery and purchase of books published in Sweden and Scandinavia, use Adlibris. Order books in German and Romance languages from F.Delbanco. If a book can't be purchased from the additional suppliers, the purchase will be made from the main supplier.

Uppsala University's need for books and journals in all subjects and languages has underlaid the choice of suppliers. The contracts are intended to facilitate the purchase of literature at prices that are most advantageous in the long-term for the University.

For more information about the contracts see:

www.e-avrop.com/upsalauniv/e-Avtal/Default.aspx

BOOKS

Searching for books

- Uppsala University Library's search system
- Library catalogues

Disa Uppsala Uni – Note!:

It only searches the title, subject words...

Only a smaller amount of our e-books –
will be gone soon!

Libris The Swedish University and Research Libraries search
service

- E-book collections/portals
- Digital reference works and word books

E-books

Uppsala University Library purchases and subscribes to approximately 400 000 e-books. The books are purchased from various publishers which all have their own platforms with different ways of displaying the e-books.

You can search among most of the e-books using the [Library's search tool](#). By ticking *Fulltext* and *Book/E-book* in the menu on the left, you can limit your search so that the hit list only contains e-book titles which you as a user at Uppsala University have access to.

[Access from home](#)

[Support for e-resources](#)

E-BOOKS

[AccessMedicine](#) (70 titles)

Medical reference works, including Harrison's Online, Goodman & Gilman's Pharmacology and Lange Educational Library. Also contains images, videos and diagnostic tests. Updated daily.

Copying/printing: Text and images may be printed for your own use or for use in teaching. Printing allowance is one chapter per session.

Downloading: No

Simultaneous user access: 3 simultaneous users per title.

[Cambridge books online \(15 000 titles\)](#)

E-books on all subjects from Cambridge University Press. Note that titles classed as "Textbooks" are not included.

Copying/printing: Chapters may be printed and copied.

Exempel på e-bokssamlingar med böcker inom datavetenskap och IT

- [Cambridge Books Online](#)
E-books on all subjects from Cambridge University Press. Note that titles classed as "Textbooks" are not included.
- [Ebrary](#)
Mycket stor samling e-böcker från ett flertal akademiska discipliner.
- [IEEE Xplore Digital Library](#)
E-böcker från Wiley och MIT press inom datavetenskap och ingenjörsvetenskap.
- [Knovel](#)
I e-bokssamlingen och sök- och analysverktyget Knovel finns handböcker inom framför allt teknik, bl a inom "Software Engineering" och "Computer Hardware Engineering".
- [Lecture Notes in Computer Science](#)
The series Lecture Notes in Computer Science (LNCS), including its subseries Lecture Notes in Artificial Intelligence (LNAI) and Lecture Notes in Bioinformatics (LNBI), has established itself as a medium for the publication of new developments in computer science and information technology research and teaching - quickly, informally, and at a high level.
LNCS reports the latest results from all areas of computer science and information technology research, development, and education.
- [Safari Books Online](#)
E-böcker inom datavetenskap och informationsteknologi. Vi har tillgång till ett urval (99) st e-böcker i denna samling. "Covers the technologies most essential to users including certification, enterprise computing, Java, Linux/Unix, Web development, Windows, XML, and more. The library subscription is valid for two simultaneous users only. If more users are trying to connect, the message "Session Unavailable" is shown. When a user logs off or closes a session, a slot will be freed for the next user."
- [Springer e-books](#)
Förlaget Springer's alla e-böcker. Uppsala universitets användare har tillgång till alla engelskspråkiga e-böcker publicerade 2005-2013 i fulltext (samt för vissa bokserier även äldre böcker.)
- [Synthesis Digital Library of Engineering and Computer Science](#)
Korta böcker, s.k. lectures inom datavetenskap och teknologi.

Lecture Notes in Computer Science

Description

The series Lecture Notes in Computer Science (LNCS), including its subseries Lecture Notes in Artificial Intelligence (LNAI) and Lecture Notes in Bioinformatics (LNBI), has established itself as a medium for the publication of new developments in computer science and information technology research and teaching - quickly, informally, and at a high level.

The cornerstone of LNCS's editorial policy is its unwavering commitment ... [show all](#)

Articles from scientific journals and conference papers:

- You can e.g. find in Uppsala University Library's search system:

Limit to journal article and if you like to
"Peer-review"

Limit to conference paper

Searching for articles:

Reference databases

- Bibliographic info, abstract, references
- Fulltext link to the article when the library subscribe to the journal.
- Scientific journal articles, conference papers, reports, patents...from many different publishers
- Multidisciplinary or subject specific databases
- Good for retrospective searching, frequently updated

Searching for articles – Reference databases

- Many smart search functions, e.g. refine results
- Very precise searches and search results (less noise)
- Controlled keywords
- Often links to cited, citing and related articles
- Search history
- Save searches and create email alerts or RSS feeds - also citations alerts!
- Export to reference management programmes

HUR FÅR JAG TAG PÅ ARTIKELN?

1. [Uppsala UB](#) - knappen vid referenserna i de flesta av databaserna: Du får en länk direkt till artikeln i fulltext om UU har tillgång till den och/eller du ser om den tryckta tidskriften finns vid UUB.
I Google Scholar behöver du, när du är utanför universitetets nätverk, göra en särskild inställning för att komma åt fulltexten, se en kort film.
2. UUB:s tidskriftslista - tryckta och elektroniska tidskrifter.
3. Beställ kopia av artikeln från annat universitet eller UUB:s externa magasin. Kostnad: Vanligtvis 80 kr/artikel.

ARTIKLAR FRÅN VETENSKAPLIGA TIDSKRIFTER OCH KONFERENSER - DATABASER OCH SÖKVERKTYG

Söker du vetenskapliga artiklar inom ämnet datavetenskap / IT? Här presenteras olika databaser och sökverktyg där du hittar artiklar inom ämnesområdet, mestadels ur internationella vetenskapliga tidskrifter och konferenspubliceringar.

- ACM Digital Library (Association for Computing Machinery)
Artiklar från tidskrifter och konferenspubliceringar inom informationsteknologi och datavetenskap. Referenser av artiklar ur ACM:s publikationer från 1947- och från andra förlag från 1985-. ACM:s artiklar är tillgängliga och sökbara i fulltext.
- Google Scholar
Google Scholar är Google's sökmotor för vetenskaplig litteratur som vetenskapligt granskade skrifter, avhandlingar, böcker, referat och artiklar, från akademiska förlag, yrkessamfund, preprintarkiv, universitet och andra akademiska organisationer. OBS! Om du inte får upp fulltextlänkarna: "Try it @ Uppsala UB" kan du gå till Settings/Inställningar och ställa in Library links/Bibliotekslänkar: skriv in Uppsala: bokta i rutorna och spara! Då kommer du åt fulltexten till Uppsala universitetsbiblioteks resurser även hemifrån.
- IEEE Xplore
IEEEExplore är en fulltextdatabas med litteratur inom teknik framför allt elektroteknik och elektronik, inklusive radio och telekommunikation samt data teknik. Den innehåller IEEE:s tidskrifter, transactions, magazines, letters, konferensproceedings och standarder samt IET:s (Institution of Engineering and Technology) tidskrifter och konferensproceedings.
[mer...](#)
- INSPEC
Inspecs kärnområden är fysik, datavetenskap, reglertechnik, IT, maskinteknik, produktionsteknik, elektroteknik och elektronik men innehåller även artiklar inom t.ex. beräkningsvetenskap, materialvetenskap och andra teknikgrenar. Länkar till fulltext i de fall Uppsala universitetsbibliotek har avtal med förlagen
- Web of Science Core Collection
Omfattande databas med referenser till vetenskapliga artiklar. Möjlighet att göra sökningar och analyser utifrån citerade publiceringar.
Core Collection innehåller databaserna: Science Citation Index Expanded, Social Sciences Citation Index, Arts & Humanities Citation Index, Conference Proceedings Citation Index.
- Scopus
SCOPUS anses vara den största referens- och citeringsdatabasen. Bred databas som täcker in alla ämnesområden. Länkar till artiklarna i fulltext i de fall Uppsala universitetsbibliotek har avtal med förlagen

Article databases:

Usage Count

The Usage Count is a measure of the level of interest in a specific item on the Web of Science platform. The count reflects the number of times the article has met a user's information needs as demonstrated by clicking links to the full-length article at the publisher's website (via direct link or Open-Url) or by saving the article for use in a bibliographic management tool (via direct export or in a format to be imported later). The Usage Count is a record of all activity performed by all Web of Science users, not just activity performed by users at your institution. Usage Counts for different versions of the same item on the Web of Science platform are unified. Usage Counts are updated daily.

Last 180 days. This is the count of the number of times the full text of a record has been accessed or a record has been saved in the last 180 days. This count can move up or down as the end date of the fixed period advances.

Since 2013. This is the count of the number of times the full text of a record has been accessed or a record has been saved since February 1, 2013. This count can increase or remain static over time.

Subject words

Every reference/record in a database is given subject words/keywords to describe its content. Sometimes the authors add the subject words

Controlled keywords and thesaurus:

Many databases use a controlled vocabulary. Indexers give every article in a database subject words (descriptors/controlled keywords) that they pick from the database' list of controlled words a so called **thesaurus**.

Advantage: The searcher does not need to take synonyms, and different expressions for the same concept, plural form/singular form etc into account. The controlled keyword captures them all.

The Thesaurus is usually hierarchical

Identify Yourself[Login](#)**New to ResearcherID?**[Join Now It's Free](#)**Search For Members**[Search](#)**Learn More:**[What is ResearcherID? | FAQ |](#)
[Interactive Tools: Labs | Training](#)**Highly Cited Research**

This resource captures the people behind the most influential publications in 21 broad subject categories based on citation metrics. Learn more about the methodology. List your current affiliation in ResearcherID to ensure your most current information is reflected in Highly Cited Research.

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the Web of Science and is ORCID compliant, allowing you to claim and showcase your publications from a single account. Search the registry to find collaborators, review publication lists and explore how research is used around the world!

DISTINGUISH YOURSELF IN THREE EASY STEPS

ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized. [Find out more.](#)

1 REGISTER

Get your unique ORCID identifier [Register now!](#)

Registration takes 30 seconds.

2 ADD YOUR INFO

Enhance your ORCID record with your professional information and link to your other identifiers (such as Scopus or ResearcherID or LinkedIn).

3 USE YOUR ORCID ID

Include your ORCID identifier on your Webpage, when you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.

[more options / values...](#)

Search with words e.g.:

review, survey, overview, summary, progress

recent, modern, current, development (often find broader overviews)

in the title- or title/abstract field. Combine the words above with OR

Be critical – does the article really give an overview of what you are looking for?

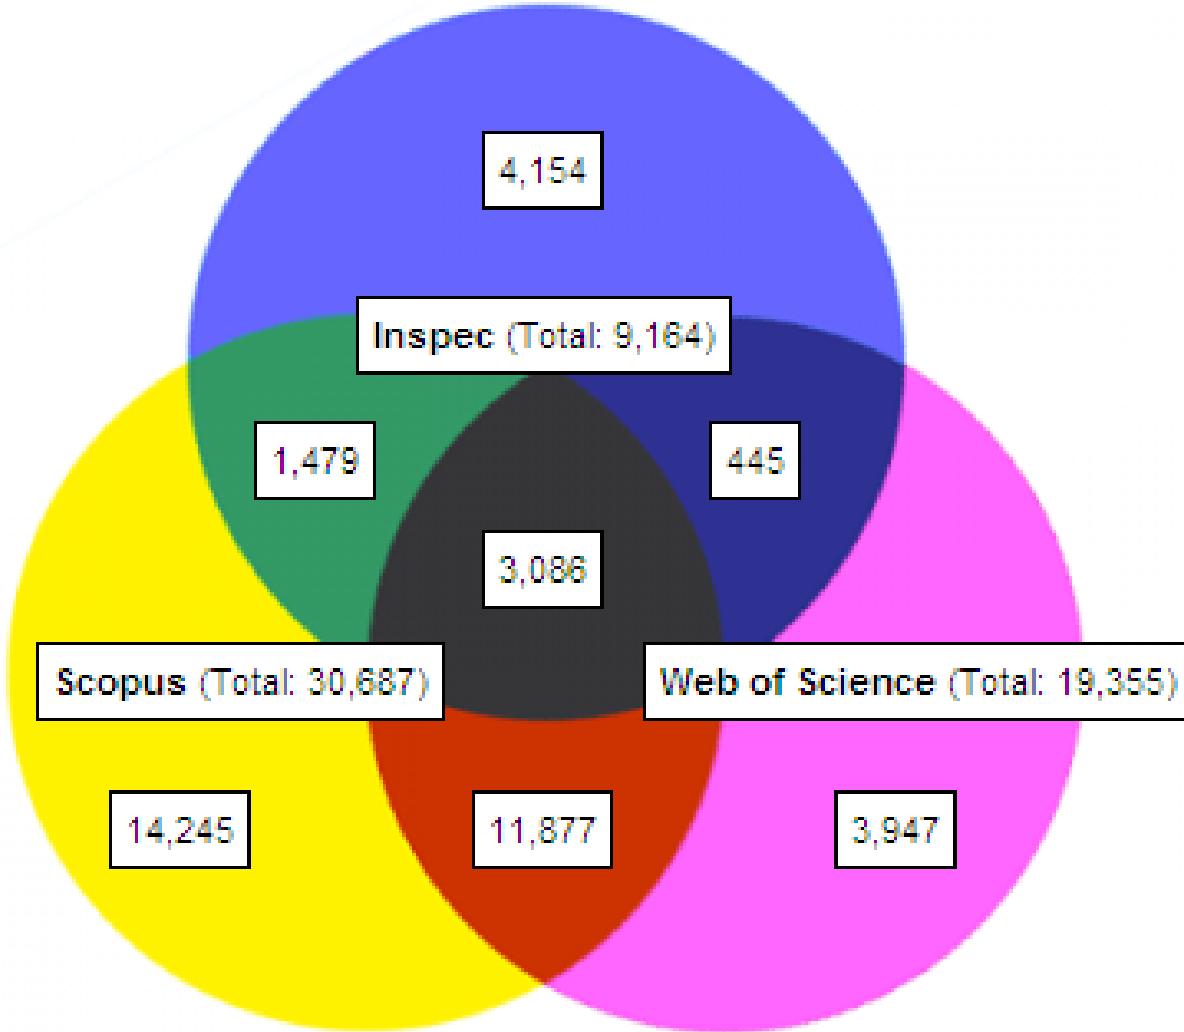

Review articles

- Critical evaluations of other published studies about a topic
- No original observation
- A meta-analysis
- Shows development within the subject area
- The author decides what is included
- Be aware that it is the author's opinion
- Good idea to find different review articles
- Good way to get quick introduction and overview

***Try more than

To find a specific article

(you already have the reference)

- Search the title of the Article in *the library's search-system* – Quick and easy
- or in *Google Scholar* – Quick and easy
- In a *reference database* – you get links from the article to the articles cited in the article in full text if available (sometimes also citing articles)
- Search the title of the Journal in *Journals A-Z...*
You get info if we have access and what years and you get both info if we have it in print and/or online.

Artikeldatabaser

För att söka efter artiklar - klicka på avsnittet 'Artiklar' för att få en lista med länkar till relevanta databaser och andra sökverktyg!

Hur vet man om en artikel eller tidskrift är vetenskapligt granskad (refereed/peer-reviewed)?

I en del artikeldatabaser kan man när man söker, markera för att man bara vill få fram peer-review artiklar.

I t.ex. Ulrichs International Periodicals kan man snabbt kolla upp om en tidskrift är vetenskapligt granskad (refereed/peer-reviewed).

Hur kan man jämföra och värdera tidskrifter?

ISI Journal Citation Reports (JCR)

Här kan man värdera och jämföra tidskrifter utifrån citeringsstatistik, bland annat med hjälp av så kallad *impact factor*, ett mått på hur ofta en tidskrift i genomsnitt citerats under en given period. Här förtecknas de ca 11 000 tidskrifter som indexeras i databasen ISI Web of Science. (ISI har mycket höga kvalitetskriterier för de tidskrifter de väljer att indexera.). Du kan söka fram en specifik tidskrift eller ta fram en lista på tidskrifter inom ett ämne.

Scopus Journal Analyzer

Här kan man söka fram de tidskrifter som indexeras i databasen Scopus och få dem analyserade i fråga om totala antalet citeringar, publicerade artiklar och en "trend line", detta i diagramform. OBS! Läs här om åtkomsten till Scopus Journal Analyzer off campus.

Google Scholar Metrics

Google Scholar Metrics provide an easy way for authors to quickly gauge the visibility and influence of recent articles in scholarly publications. Scholar Metrics summarize recent citations to many publications, to help authors as they consider where to publish their new research.

Information om tidskrifter

- Genamics Journal Seek

Här förtecknas närmare 100 000 tidskrifter. Information om t.ex. hur en tidskrifts titel förkortas, eller hur en titelförkortning ska utläsas, ISSN, innehållsbeskrivning, ämneskategorier och länkar till tidskrifternas webbplatser för mer info.

- Ulrichsweb (Ulrich's Periodicals Directory)

Här förtecknas närmare 300 000 tidskrifter och andra seriella publikationer. Du kan t.ex. snabbt se om en tidskrift är vetenskapligt granskad och få information om innehåll, språk, startår, hur ofta den kommer ut, vilka databaser du kan använda för att hitta artiklar i den, med mera.

Artiklar ur svenska dagstidningar, branschtidningar och populärvetenskapliga tidningar

- Artikelsök

Referenser till artiklar i svenska tidningar och tidskrifter. En del referenser länkar vidare till artiklar i fulltext. Artiklar från 1979 och framåt.

- Retriever Research (Mediearkivet)

Artiklar i fulltext från ca 400 dagstidningar och tidskrifter. Artiklar finns inlagda från 1987, men med olika startår för respektive dagstidning och tidskrift.

Artiklar ur utländska dagstidningar, branschtidningar och populärvetenskapliga tidningar.

- Library PressDisplay

Dagstidningar från hela världen i fulltext i exakta kopior av de tryckta utgåvorna. Man får tillgång till artiklar 60 dagar bakåt i tiden.

- Factiva

Artiklar i fulltext ur internationella och lokala dagstidningar, tidskrifter, nyhetsbrev, media program (BBC, ABC, NBC), webbplatser. Material från mer än 100 länder på över 20 olika språk.

- Uppsala universitetsbiblioteks söktjänst

eller sök i sökrutan längst upp till höger i denna guide.

När du fått upp en träflista kan du i vänstermarginalen begränsa till enbart Tidningsartiklar, Branschtidningarartiklar och populärvetenskapliga artiklar.

(För svenska artiklar ur den här typen av publikationer rekommenderas hellre de svenska databaserna ovan.)

På Ångströmbiblioteket

finns dagens nummer av DN, SvD, UNT samt årets nummer av en del tidningar och tidskrifter, t.ex.: Computer Sweden, Datormagazin, iPhone, iPad & MacGuiden, M3, MacWorld: Svenska Mactidningen, Mobil, PC för alla och Techworld.

Patent

Patent är en viktig informationskälla för att få kännedom om ny teknik. Patent kan t.ex. också vara bra att titta på om man vill få tag på konstruktionsritningar. Läs mer om patent längst ner på sidan. Här följer databaser och andra webbplatser med patent.

Databaser

- Espacenet

Databas med patent och patentansökningar från hela världen inklusive Sverige, med början ca 1920 och framåt. Fulltextlänkar till många av patenten. Välj 'Mosaics' för att se ritningar.

- Google Patent Search

Amerikanska patent i fulltext från 1790 och framåt.

- PatentScope

WIPO:s webbportal för patentinformation. Via PatentScope kan du söka bland över en miljon publicerade PCT-ansökningar, ta del av offentliga uppgifter ur akterna och studera dokumenten online. PatentScope innehåller även allmän information om patent, statistik, nyhetsnotiser och mycket annat.

- Nordiska patent

Alla svenska patent från nr 1 och framåt, totalt drygt 425 000 dokument, alla finska patent från 1969 och framåt (med svenska sammandrag), danska patent från 1990 och framåt, samt norska patent från 2000 och framåt. Sammanlagt 530 000 patent. Patenten är sökbara i fulltext.

Patentverk

- Patent- och registreringsverket (PRV)

Det svenska Patent- och registreringsverkets webbplats där du kan läsa om patent, ladda ner blanketter, beställa patentdokument och mycket mera.

- European Patent Office (EPO)

- World Intellectual Property Organization (WIPO)

powered by EPO and Google

An electromechanical motor (1) comprises an object (2) to be moved, a vibrator beam (10), at least two protruding portions (12) attached to the vibrator beam, a normal force providing arrangement (40) applying a normal force (F) between the object and actuating ends (11) of the protruding portions for interaction with the object. The vibrator beam has vibrator beam electrodes (18A, 18B) for exciting at least one vibrator beam active volume (14) of electromechanically active material, enabling bending the vibrator beam perpendicular to a main extension direction of the vibrator beam and along the protruding portions (12). Control electronics (50), connected to the vibrator beam electrodes, is configured for providing resonance electrical signals causing the vibrator beam active volume to induce a resonant bending vibration and is further configured for providing quasi-static electrical signals causing a quasi-static motion of the actuating ends, superimposed on

The EPO does not accept any responsibility for the accuracy of data and information originating from other authorities than the EPO; in particular, the EPO does not guarantee that they are complete, up-to-date or fit for specific purposes.

TECHNICAL FIELD

[0001] The present invention relates in general to fine positioning motors, and in particular to motors driven by excitation of electromechanically active elements.

BACKGROUND

[0002] Motors driven by the action of shape changes of electromechanical elements have been used for a while, in particular for small motors and/or where fine positioning is of importance. Non-exclusive examples of electromechanically active materials are piezoelectric materials and electrostrictive materials. Electromechanical motors can be divided in two main groups; ultrasonic and positioning motors.

[0003] The ultrasonic motors (UM), which operate in the ultrasonic frequency range, are typically relatively fast while the positioning motors (PM) that operate at some few kHz are slow in comparison. The great advantages with the PMs are the possibility to reach resolutions better than nanometres while an UM typically has a resolution in the order of pm. Less known and therefore less utilized is the higher ratio of force-to-volume of the PM in comparison with an UM. This property is partially explained by the possibility to optimise the PM from a force point of view. An important advantage of a UM is the operation in the inaudible frequency range. The motors are completely silent to the human ear as long as the motor is running with constant operating speed. The positioning motors are on the other hand typically operating in the audible frequency range and the noise can be a major problem in applications where motors are in operation close to humans. A few experimental PM designs in which the actuators are intended to be driven with ultrasonic frequencies have been tested. However, such designs often account heating problems.

[0004] Problems with prior art electromechanical motors are thus that fine positioning motors typically cause disturbing noise and that silent electromechanical motors have an in many applications insufficient positioning accuracy.

Ion Insertion into Electrode Materials Studied with X-Ray and Electron Spectroscopic Methods

▼ Henningsson, Anders

Uppsala University, Teknisk-naturvetenskapliga vetenskapsområdet, Physics, Department of Physics.

2002 (English)

Doctoral thesis, comprehensive summary (Other academic)

Abstract [en]

Ion insertion into electrode materials can be used to store energy in battery applications. In this thesis, photoelectron spectroscopic and x-ray absorption spectroscopic methods have been used to study the change of the electronic structure of host materials during electrochemical ion insertion.

Specifically, the properties of ion insertion into nanoporous TiO₂ were studied. It is demonstrated that the insertion of Li ions results in a reduction of the Ti⁴⁺ sites in TiO₂ to Ti³⁺ sites close to the inserted Li ion. The intensity of the Ti³⁺ is directly correlated to the number of inserted electrons. It is also shown that the two phases resulting from moderate insertion can be detected by studying the electronic structure of inserted Li ions and the behavior observed can be correlated with electrochemical measurements.

Insertion of ions into tungsten oxides is a potential candidate for smart window and display applications. Ion insertion into these materials was, also studied with electron spectroscopic methods. The insertion of H⁺ reduces W⁶⁺ to W⁵⁺ and further insertion results in a reduction to W⁴⁺. Cyclic voltammetry shows two reduction peaks where the first peak implies reduction of W⁶⁺ to W⁵⁺ and the second peak can be associated with further reduction to W⁴⁺.

During the first charge/discharge cycles of a battery based on graphite anodes a solid electrolyte interface layer is formed on the electrode surface. This layer consumes some of the charge carrying Li ions, hence decreases the capacity of the battery. A careful characterization of this layer has been performed to aid in the further development of this type of battery.

Searching and writing

Begin by formulating your problem

It's always easier to find information if you have prepared specific questions and terms in advance. So start off by analysing your task and formulating your search terms.

Here are some leading questions to help you:

- What do you need the information for (level, depth)?
- How are problems formulated in your subject?
- How can your problem be summarised in a search query?

Try to find different ways of describing your subject or formulating your question. Narrow this down by using individual words or terms. Use an encyclopaedia or handbook (subject overview) to find suitable search terms. Regard your search as a process in which you'll find better and more adequate search terms as your work progresses.

If you already have a book, an article or a student paper on your subject area, the reading and reference lists are a good starting place for finding materials and references. The books used on your course should also prove helpful.

What are you looking for?

Search for information in different kinds of library catalogues, databases or on the internet. Your choice of which finding tool, search engine or database to use will depend on how you have formulated your problem.

The most common information sources are books and articles from journals and newspapers. The most up-to-date research is generally found in research reports and scholarly journals. [A scholarly publication](#) contains research findings that have been reviewed by subject experts, so called peer review, prior to being published.

The Library gives access to a large number of [quality assured databases](#) where you can find all kinds of information. For example, articles, e-books, TV-programmes,

Examples:

financ* will generate

- financial
- finances
- financial indicators etc.

****economics*** will generate

- macroeconomics
- microeconomics, etc.

wom*n will generate

- woman
- women

Search with subject words

Another way to narrow your search is to use subject words. Subject words are always used when books, articles and reports are registered in library catalogues and databases, and these are organised according to certain principles.

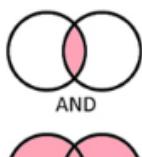

Subject words vary in different databases, countries and subject areas. You can find these words under headings such as "subject", "index" or "thesaurus". Check which subject words are used in the particular database you are accessing and use them in your searches. This is an easy way to find relevant information.

Combining terms using boolean searching

Most online databases and search engines use the same system to combine words in different ways. The method is called boolean searching. The most common for databases is to use three commands/operators: AND, OR, NOT.

AND – narrows your search and leads to fewer hits. Use AND when two or more words or terms must be in the same sources/reference.

*Example: European Union AND
Enlargement*

Reference management software

Using a reference management software makes writing your essay easier. The software helps you to save and organise your references and enables you to create a bibliography instantly.

By using the reference management software you can

- import references from different databases and save them in one place
- keep track of your references
- make in-text citations, footnotes and bibliographies
- share references with colleagues

Examples of reference management software:

EndNote A software that you purchase and install on your computer. Save and organise your references and PDF-files, insert citations into a document and create a bibliography.

EndNote Basic A free online version of EndNote. Save and organise your references, insert citations into a Word document and create a bibliography.

Mendeley A free software that works both online and as desktop software. You can save references and PDF:s both online and on your computer, insert citations into a Word document and create a bibliography.

Zotero A free software that works with the browser Firefox, Google Chrome or Safari. Save references to books, articles and websites and more, tag your records, add notes and save snapshots of websites. Use Zotero with MS Word, OpenOffice, LibreOffice or NeoOffice to insert citations using various styles (e.g. Harvard, APA, MLA) directly in

Reference management software

Using a reference management software makes writing your essay easier. The software helps you to save and organise your references and enables you to create a bibliography instantly.

By using the reference management software you can

- import references from different databases and save them in one place
- keep track of your references
- make in-text citations, footnotes and bibliographies
- share references with colleagues

Examples of reference management software:

[EndNote](#) A software that you purchase and install on your computer. Save and organise your references and PDF-files, insert citations into a document and create a bibliography.

[EndNote Basic](#) A free online version of EndNote. Save and organise your references, insert citations into a Word document and create a bibliography.

[Mendeley](#) A free software that works both online and as desktop software. You can save references and PDF:s both online and on your computer, insert citations into a Word document and create a bibliography.

[Zotero](#) A free software that works with the browser Firefox, Google Chrome or Safari. Save references to books, articles and websites and more, tag your records, add notes and save snapshots of websites. Use Zotero with MS Word, OpenOffice, LibreOffice or NeoOffice to insert citations using various styles (e.g. Harvard, APA, MLA) directly in your document.

Referensstilar

Här har vi samlat exempel på hur man kan referera enligt några vanliga referensstilar. Flera av stilarna kan finnas i olika varianter och våra exempel ska bara ses som ett förslag och inte ett facit. Du bör alltid kontrollera med din handledare, lärare eller institution vad som gäller för dig och ditt arbete. Oavsett vilken stil du använder bör du vara konsekvent.

APA Style beskrivs i *Publication manual of the American Psychological Association*, 6 uppl. och används vanligtvis inom beteendevetenskaper och samhällsvetenskapliga ämnen.

Chicago beskrivs i *Chicago manual of style*, 16 uppl. och publiceras av University of Chicago Press. Chicago kan användas antingen med fotnoter eller med källhänvisningar inom parentes i texten.

Harvard finns i många varianter men har alltid källhänvisningar inom parentes i texten och en referenslista i slutet av dokumentet. Harvard används ofta inom samhällsvetenskapliga ämnen.

MLA beskrivs i *the MLA style manual*, 3 uppl. och publiceras av Modern Language Association of America. Denna stil används ofta inom språk och humaniora. MLA har källhänvisningarna inom parentes i texten.

Oxford används med fotnoter och är vanligt inom exempelvis humaniora, teologi och juridik.

Vancouversystemet (sifversystemet) är vanligt inom medicin, naturvetenskap, fysik och teknik. Källhänvisningarna anges med en siffra inom hakparentes och i referenslistan presenteras referenserna i nummerordning.

Referenshanteringsprogram

Du kan också ta hjälp av ett referenshanteringsprogram för att hålla reda på referenserna. Du hittar information om några av programmen och bibliotekets kurser i dessa på bibliotekets webbsida för [Referenshanteringsprogram](#)

Referring to Literature

One of the distinguishing features of academic writing is that it is informed by what is already known, what work or research has been done before, and/or what ideas and models have already been developed. Thus, academic writers frequently make reference to external sources. In some cases, where the individual author is important, the author's name will be the main subject of the sentence; in other cases, the source may only be mentioned in brackets (....) or via a number notation system (e.g. footnotes and endnotes). The 'author as subject' style is less common in the empirical sciences and more commonly used in the humanities. The verbs and verb phrases typically used for referring to sources are listed below. Note that different referencing systems are used in different disciplines. In the examples given here, the Harvard in-text referencing system has been used.

The Literature Review: it is the purpose of the literature review section of a paper or dissertation to show the reader, in a systematic way, what is already known about the research topic as a whole, and to outline the key ideas and theories that help us to understand this. As well as being systematic, the review should be evaluative and **critical of the studies** or ideas which are relevant to the current work. For example, you may think a particular study did not investigate some important aspect of the area you are researching, that the authors failed to notice a weakness in their methods, or that their conclusion is not well-supported.

A note on verb tenses: For general reference to the literature, the present perfect tense (have/has + verb + ed) tends to be used. For reference to specific studies carried out in the past, the simple past tense is most commonly used. This is always the case where a specific date or time in the past forms a part of the sentence. When referring to the words or ideas of writers, the present tense is often used if the ideas are still relevant, even if the author is no longer alive. The examples given below reflect these general patterns.

General descriptions of the relevant literature

A considerable amount of literature has been published on X. These studies

There is a large volume of published studies describing the role of

The first serious discussions and analyses of X emerged during the 1970s with

The generalisability of much published research on this issue is problematic.

What we know about X is largely based upon empirical studies that investigate how

During the past 30 years much more information has become available on

In recent years, there has been an increasing amount of literature on

A large and growing body of literature has investigated

Over the past decade most research in X has emphasized the use of

General reference to previous research/scholarly activity (usually more than one author)

Many historians *have argued that* (e.g. Jones, 1987; Johnson, 1990; Smith, 1994).

There is a consensus among social scientists that (e.g. Jones, 1987; Johnson, 1990; Smith, 1994).

Numerous studies *have attempted to explain* (for example, Smith , 1996; Kelly, 1998; Johnson, 2002)

Traditionally, *it has been argued that* (Smith, 1982; O'Brien, 1984)

Recent evidence *suggests that* (Smith, 1996; Jones 1999; Johnson, 2001)

Recently, *in vitro* studies *have shown that* X can (Patel et al., 1997; Jones et al., 1998).

Surveys such as that conducted by Smith (1988) *have shown that*

Several attempts *have been made to* (Smith, 1996; Jones 1999; Johnson, 2001)

Several studies *have revealed that* it is not just X that acts on (Smith, 1996; Jones

Several biographies of Harris *have been published*. Smith (2013) presents

Several studies investigating X *have been carried out on*

Data from several sources *have identified* the increased X and Y associated with obesity.

Previous studies *have reported* (Smith, 1985; Jones, 1987; Johnson, 1992).

Previous research *has indicated* that various X indicators have a positive impact on (Al-Masry, 2008)

Previous research findings into X have been inconsistent and contradictory (Smith, 1996; Jones 1999,

A number of studies *have found that* (Smith , 2003; Jones, 2004).

A number of studies *have examined* X (e.g. Smith, 2003; Jones, 2005), but has investigated

Twenty cohort study analyses *have examined* the relationship between

At least 152 case-control studies worldwide *have examined* the relationship between.....

Other studies *have considered* the relationship

The relationship between X and Y *has been widely investigated* (Smith, 1985; Jones, 1987,

The causes of X have been widely *investigated* (Jones, 1987; Johnson, 1990; Smith, 1994).

The geology of X *has been addressed* in several small-scale investigations and

Factors thought to be influencing X *have been explored* in several studies.

Xs *have been identified* as major contributing factors for the decline of many species (1).

X *has also been shown* to reverse the anti-inflammatory effects of Y in murine-induced arthritis (11).

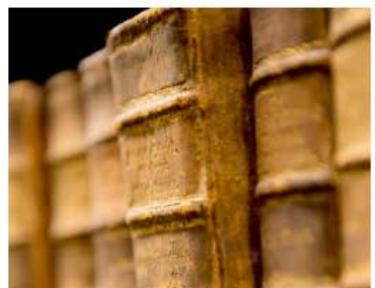

It has been suggested that levels of X are independent of the size of the Y (Smith et al., 1995)

Apps for studies and work

Many library databases, eBooks and eJournals can be accessed with a smart phone or other mobile device. You can find many apps and mobile resources to support your study and research. Here we present some free apps available for both Android and iOS.

[BrowZine](#) is a service that helps you find, read and organize the library's journal subscriptions on your tablet. You need to download the app from App store or Google play, open the app, choose settings and the Uppsala University, and then use your CAS login. You can search and find the journals presented in an attractive way for tablets, create your own book-shelf, get alerts, save and export articles, open articles in reference programs like EndNote and Zotero.

[Bluefire reader](#) is an app for reading e-books. You can use it to borrow books from the public library or reading for example books from ebrary through Uppsala university library. You can add notes, mark text and look up words in a dictionary. To be able to borrow e-books in Bluefire reader, you need to create an Adobe ID for yourself, and connect that to the reader. An Adobe ID can be created for free at [Adobes website](#).

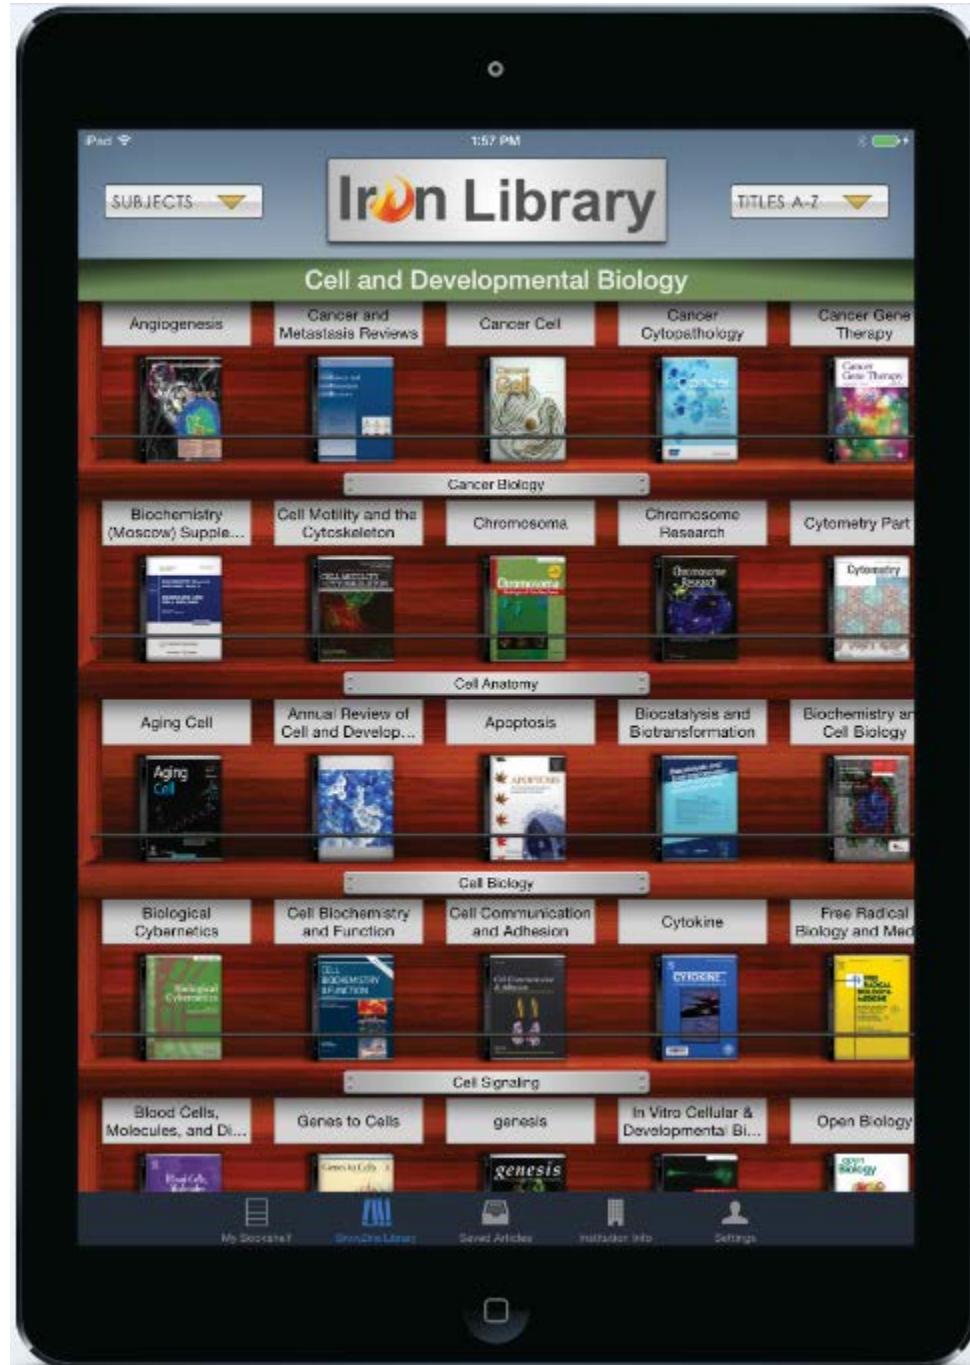

[Dropbox](#) is a so called cloud service, where you can save your files to access them on several devices or anywhere with an internet connection. You create folders, just like you do on the computer, and those folders are synced over the internet, and gives you access to the files regardless of your device. It's a good way to back up your files if your laptop should break or you would lose your phone. You can have private folders, or share them with others, which is helpful for group work.

The search interface features a navigation bar with tabs: Search all, Books, and Articles. Below the tabs is a search input field with a magnifying glass icon. Underneath the input field are search options: Search for (radio buttons for all, author, title), Advanced search, and Help. To the right of the search bar are links: Databases A-Z, Library Catalogues, Journals A-Z, and Subject Guides.

Research support

Do you need help to get started on information searches, electronic publication or reference management? We provide services and support for you as a researcher – why not put our expertise to good use!?

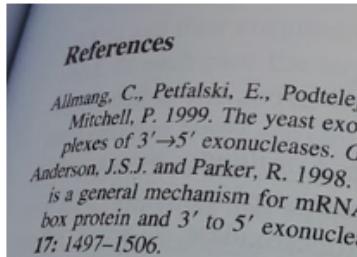

Electronic publication and open access

We provide guidance in matters such as open access, electronic publication and self-archiving. We provide support in discussions about publication strategies and receive discounts on open access publication fees from a number of companies.

[Register with DiVA](#)[Open access](#)[DiVA helpdesk](#)

Reference management

Do you need help in choosing a reference management program? We provide training and support when you need to make such a choice.

[Courses and events](#)[Reference management software](#)

Publication and thesis production

We handle the entire publication process for books as well as theses and monographs in Acta and other faculty series. We provide support in the form of thesis templates, practical publication help and information regarding copyright issues.

Publish

Uppsala University has a long tradition of distributing and providing access to the university's publications. Doctoral theses, articles, student papers and other types of publications can be searched for and downloaded in the university's open archive, DIVA.

The library provides support in questions concerning Open Access and publishing. Below you will find more information about DIVA, Open Access and the series Acta Universitatis Upsaliensis.

[Search in DIVA](#)

[Log into DIVA](#)

[Thesis Production](#)

ABOUT DIVA

At Uppsala University you can register your publications and make them freely available by publishing open access in DIVA. DIVA (Digitala Vetenskapliga Arkivet) is Uppsala University's system for digital publishing and for registering publications produced by researchers, teachers and students.

[Read more about DIVA.](#)

MORE INFORMATION

- Publish and post your doctoral thesis
- Publish your student paper/degree project
- DIVA Helpdesk
- Research support - service to you as a researcher

OPEN ACCESS

Open access publishing can be accomplished in several ways in order to make your research results freely available and thus enhance the effect of your publications.

You can either publish in a journal or other kind of publication without open access and deposit a copy in an open archive like DIVA (self-archiving), or publish in a journal with open access.

Photocopies and photographic services

At the University Library you can make copies and printouts yourself. You can also get help from the [Section of Digital Imaging at Carolina Rediviva](#), when for example you want copies from fragile or cumbersome items or digital pictures.

[More about photocopies and photographic services](#)

Courses

Want to search and collect, publish or find items in special collections? We run tailor-made courses for researchers and doctoral students. We also teach people about and train them in using reference management, information searches and specialist statistics, law and economic resources programs.

In addition, we teach people using our unique cultural heritage collections. These include images, maps, manuscripts, old prints and music. Courses can be arranged in the library with access to original materials or remotely using digital representations of items. We can arrange seminars as special course components and guest lectures by researchers in collaboration with the various faculties.

[Planned open courses are advertised in the schedule of events](#)

TAILOR- MADE COURSES

Information search

Support and guidance for information searches within various subject areas via, for example, databases, books, periodicals and websites. We know how to apply filters in order to get at the relevant research work. You cannot find what you are looking for? For rapid help, [chat with Ask The Library](#) or phone us. You can also [book a librarian](#) for individual assistance.

Mobile academics

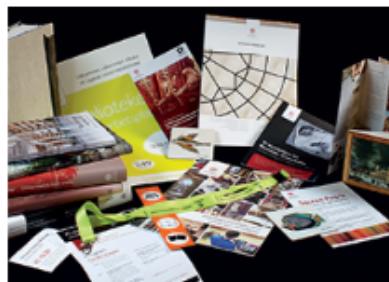

We can help you to get started on e-book reading and using smartphones and tablets in your work – become a [mobile academic](#). Planned open seminars are advertised in [the schedule of events](#).

Present your research

As a researcher, you can increase your visibility by example put your publications on your profile page on the university's website and register them in DiVA.

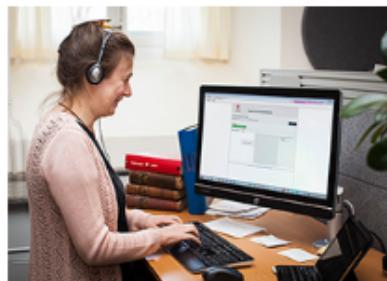

We can help you create a ORCID ID and show how you can see a journal's impact factor. You can also get tips on how you can get notified when you are quoted.

The poster production, graphic design and education in different types of presentation software, we can help those who want to present your research. Contact the [Graphics Service](#) for design and production advice.
